[+48539426540](tel:+48539426540)

### Location

Poland, Wroclaw

### Education

Odessa National Polytechnic University from 2008 to 2013

Computer Systems Institute (Computer intellectual Systems and Networks)

### About me

I'm a **Front-End / Full-Stack JavaScript Developer** with **over 10 years** of experience building web solutions — from clean, responsive interfaces to large-scale enterprise platforms.

I started with classic front-end development using **HTML, CSS, and jQuery**, and gradually evolved into modern frameworks like **Angular, TypeScript, NestJS**, and **Node.js**.

Throughout my career, I've worked in both **outsourcing** companies and **product** teams, where I was responsible for front-end **architecture**, **microservice** development, **mentoring** junior developers, and conducting strong **code reviews**.

I enjoy writing **clean, structured**, and **maintainable** code, designing thoughtful interfaces, and creating solutions that combine **usability, performance**, and **reliability**.

Currently, I'm focused on advancing in software architecture and technical leadership, while continuously improving my approach to building **scalable front-end systems**.

### Tools experience

**HTML 5**  
(11 years)

**CSS (LESS, SASS)**  
(11 years)

**Java Script**  
(10 years)

**TypeScript**  
(8 years)

**Angular 2+**  
(8 years)

**NodeJs**  
(6 years)

**NestJs**  
(6 years)

**Gulp / Webpack**  
(6 years)

**Docker**  
(2 years)

**Git, Jira ...**

# Work experience

**Front-End (Tech Lead) at [Monster Lead Group](#)** from May 2021 to the present

**TOOLS AND TECHNOLOGIES:**

Angular 20, Angular-cli, Signals, RxJs, NGXS, Angular Material, FxLayout, Ag-Grid, Storybook, Jest

**PROJECTS DESCRIPTION:**

- MLG offers mail-order marketing services in the United States. Our team was engaged in the transfer of this business to online services.
- This application is for clients who want to order mailing letters, it allows you to select templates, fill in data, select leads for mailing, calculate cost, terms.

**RESPONSIBILITIES:**

- Architecture development of front-end applications and libraries
- Components and modules development
- Code review, mentoring

**Full-Stack JavaScript Developer at [iBuilt](#)** from September 2019 to May 2021

**TOOLS AND TECHNOLOGIES:**

JS ES6, Angular 11, RxJs, Angular Material, Angular-cli, FxLayout, Storybook, Jasmine & Karma, NestJs, MongoDB

**PROJECTS DESCRIPTION:**

- DTP or Digital Twin Platform is a platform for management buildings such as residential complexes or hotels. The building owner has a digitized version of his property and can control and maintain its lifetime circle.
- GDS or Generative Design System is a SaaS that made it possible, according to the specified parameters, to generate a fully-featured building layout in Revit format for further construction.

**RESPONSIBILITIES:**

- Development of front-end and back-end for internal platforms
- Development of a library for interacting with 3d models
- Development of a microservice for calculating costs and benefits from proposed buildings

**REASON FOR LEAVING:**

The company stopped the development of the application.

**Front-End Developer at [Booking Health GmbH](#)** from October 2018 to August 2019

**TOOLS AND TECHNOLOGIES:**

JS ES6, Angular 10, RxJs, Bootstrap, Angular-cli, GraphQL, NodeJs, NestJs, AWS S3, MongoDB

**PROJECTS DESCRIPTION:**

- It is a platform for registering users from different countries for medical examinations.
- In this system, users could then see the examination results such as MRT, X-ray, etc.

**RESPONSIBILITIES:**

- Architecture development of front-end applications
- Development of the file manager library
- File manager API development with NodeJs
- Development of a library for viewing X-RAY and MRI

**REASON FOR LEAVING:**

The project was released.

## **Front-End Developer at [Attract Group](#)** from December 2015 to October 2018

### **TOOLS AND TECHNOLOGIES:**

HTML, CSS (LESS, SCSS), JavaScript (jQuery), Gulp, Webpack, AngularJs, Angular2+, TypeScript, Electron, Node.Js, Wordpress, Docker, Jenkins

### **PROJECTS DESCRIPTION:**

- Task management system, the project was used by the company (similar to Jira) (Angular)
- Monolithic applications (HTML, CSS, JS + Laravel or Wordpress on the backend)
- Bots traders (working with cryptocurrency) (Node.Js + TypeScript)

### **RESPONSIBILITIES:**

- Layout of templates from PSD and other editors
- Development front-end applications on Angular
- Development microservices with NodeJs

### **REASON FOR LEAVING:**

Another company offered more favorable terms.

## **HTML/CSS Developer at [EXSY](#)** from August 2014 to December 2015

### **TOOLS AND TECHNOLOGIES:**

HTML, CSS (LESS), JavaScript (jQuery)

### **PROJECTS DESCRIPTION:**

- There were many projects (about 30), I can not single out any projects

### **RESPONSIBILITIES:**

- Layout of templates from PSD and other editors

### **REASON FOR LEAVING:**

Too many similar projects
